SAFETY TIP OF THE MONTH

Tire Failure

You seldom hear a tire go flat so keep these few things in mind while riding:

- If the front tire goes flat or starts to lose air pressure the steering will feel heavy.
- If the rear tire goes flat or starts to lose air pressure the rear of the motorcycle may jerk or sway from side to side.
- If either tire goes flat while riding hold your handgrips firmly, ease off the throttle, and keep a straight course!

" h
 May the sun rise in front of you, may the rain fall behind you
 and the wind follow you.
 May the angels of your brothers and sisters who have gone
 before you guard your travels,
 for they know the perils of the road ahead of you.
 Keep safe through the rough city streets on your way to the _____
 land of the swirling turns and rolling hills.
 Let the turning colors of fall keep you warm. Let the eagle
 guide you to the mountain tops.
 Let the Moon's light guide you through the night.
 May your tires not fail you, nor your engine grow old.
 May your bike draw life from the streams you pass. Keep your
 seat soft and your mind sharp.
 Let the air of spring breathe life into your soul, to journey to
 another adventure beside your brothers and sisters.
